107								Quantum Physics and Photonics - Garth is a lecturer on the Physics course at UEA. He will talk about the research he is involved with and what it is like to study physics in Norwich
	107							Simon Foster - Imperial College London. Simon is a space scientist who will talk about his work in Solar Science and Climate Change, and about studying at Imperial
	102							Robotics and Electronic Engineering at Essex University - Exciting courses at Essex University - a must for electronics and computing students.
		107						Primordial black holes and gravitational waves - Hooshyar will talk about his research into the Early University and Physics at Portsmouth
		102						Mechanical Engineering - Jos is an admissions tutor for mechanical engineering at Bath University.
			107					Niamh, a former student, will talk about her experiences of applying for a degree apprenticeship and routes into degree apprenticeships;and day to day life as an apprentice.

					107				Niamh will talk about environmental engineering as a whole and about how it relates to physics; then link this to tests you do and how they relate to real world climates.
						107		107	Looking for a course in Physics or Engineering? Why not come along and start looking into that in depth (with some help?)
							107		What do I need to get onto a Physics degree? Patricia is the admissions tutor at Bath University and will tell you what they look for in potential students.
